RE: PABCO® Gypsum LEED v4 MR Credits

PABCO® Gypsum operates two gypsum panel manufacturing plants in the United States at the addresses below:

- 8000 E Lake Mead Blvd.
Las Vegas, NV 89115
United States
- 37851 Cherry St
Newark, CA 94560
United States

Our Las Vegas facility utilizes naturally occurring gypsum mined from our adjacent mine. Our Newark facility utilizes naturally occurring gypsum outsourced from an external mine. Our 100% recycled paper for the facings is sourced from PABCO® Paper located at 4460 Pacific Blvd in Vernon, CA.

3/8" PABCO FLEX™ is manufactured at our Las Vegas facility using 1% post-consumer and 12% pre-consumer recycled content, including 100% recycled paper used for the face and back of the wallboard. If there is anything further that I can assist with, please do not hesitate to ask.

Thank you.
